WORK EXPERIENCE

TOIA | Full Stack *Software Engineer* | Remote, US |
React, Node, Mongoose, Express, Javascript, Redux, Material UI.
March 2021 - PRESENT

- Intensive research, enhanced software functionality, connecting 3rd party APIs, coding, testing, debugging, and maintenance.
- Took part in hands-on Software Architecture and design to large scale systems.
- Designed UI/UX frontend with React Css, HTML and Material UI.
- Adapted to changes through company requests.
- Microservices the backend using Node.js, express, Mongoose.
- Performed tasks with a positive mindset, worked though technology constraints, designing trade-offs and honest communication with the Tech team of 3 and Owners.
- Developed solutions through phases of the software development life cycle and proactively handled problems arising with the team, code, or design specifications.
- Solved problem of multi-vendors routing user workflow and implementation..
- Implemented Stripe Payment gateway.
- AWS S3, AWS deployment, GitHub CI/CD pipeline.
- Tested with Jest and Typedoc

Roots Ecommerce | Jr. Full Stack *Software Engineer* | Remote, US
Python, Django, CSS, HTML
July 2021 - Jan 2022

- Developed, authenticated, maintained, enhanced software functionality using unique authentication roles.
- Docker & AWS
- Stripe Api and routing.
- Postgresql
- I used Nginx for ssl certificates

EDUCATION

Kenzie Academy from Southern New Hampshire University
A 12-month, project-based, Front-end & Back-end (Full Stack) development curriculum designed by industry practitioners and advised by employer partners.

- **PROJECT MANAGER**, **SCRUM Master**, and **co-contributor** to software development. Established foundations, and hands-on experience in **Python**, **Django**, *HTML, CSS, JavaScript*, and *ReactJS*, with a final Project completed in *MERN* for **Front-end**. Accomplished the final project in *Django* for the **Back-end**.
- Productive and efficient member of a remote agile team, effectively acting as Software Developer with great team communication.
- Gathered requirements, **met deadlines**, and created real-world applications. Involving virtual environments, unit testing, **OOP**, building and connecting to 3rd party **REST API**, web requests, and user authentication systems.
- Facilitated collaborative work with team assignments.
- Refined and finalized designs by code implementation, validation, and debugging.

TECHNICAL SKILLS

Python
React
Django
HTML
CSS
NGINX
Digital Ocean
Typescript
API
Javascript
MongoDB
Express
Redux
Node
DRF
Jest
NPM
TDD Quality
Jest
TypeDoc
GraphQL
GitHub CI/CD pipeline
AWS multi
Docker

CERTIFICATIONS

Frontend Development Certificate | **Kenzie Academy from SNHU**| **Jan 2021**

Full Stack Development Certificate | **Kenzie Academy from SNHU** | **July 2021**

Software Architecture & Design of Modern Large Scale Systems
